

VALUE PROPOSITION

ANIMAX Tracesure® Sheep features patented diffusion technology® to safely supply ewes and rams with a consistent release of essential trace elements for up to 6 months, supporting their digestion, immunity, and reproduction.

PRECAUTIONS

- Each bolus should be given at intervals exceeding 6 months, unless otherwise authorised by a vet
- If supplying copper, the copper status of the flock should be known and no other form of copper supplement should be given immediately prior or for 6 months from administration. DO NOT use Tracesure® Sheep with copper in housed sheep or breeds of sheep known to be particularly susceptible to copper toxicity, such as North Ronaldsey, Texel, Lley and crosses of these breeds.
- Simultaneous supplementation of additives with a maximum content from other sources to those incorporated in a bolus should be avoided.

PRODUCT DESCRIPTION

A complimentary mineral feed bolus for sheep over 20kg (Tracesure® Sheep without copper) or over 40kg (Tracesure® Sheep with copper).

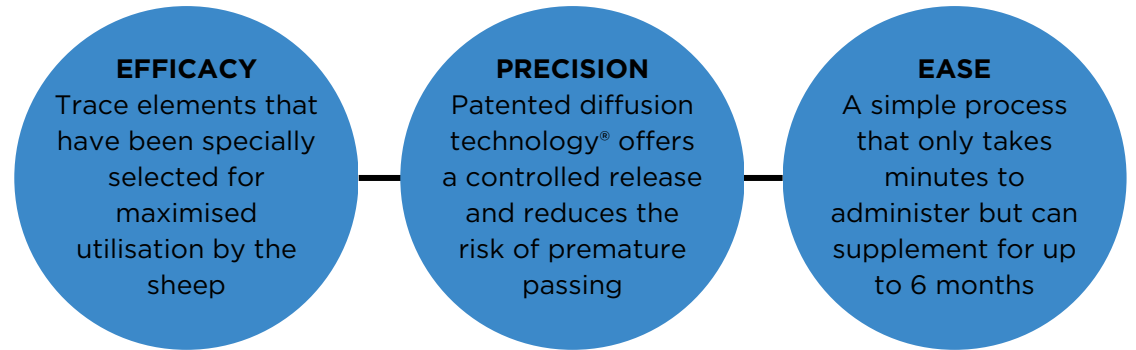

PROACTIVE BOLUSING PROGRAMS

- Best for pre-tupping and pre-lambing
 - Alternatively can be given at scanning and pre-turnout
- (Use approved applicator)

TARGET SPECIES

- All sheep systems
- Any other 20kg+ /40kg+ ruminants
